EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on 2/5/04, assigned serial 10/772499 and title "Display method and apparatus for navigation system for performing cluster search of objects".
2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

After carefully reviewing the application in light of the amended claims and the additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

As per claims 1 and 16, the prior art of record does not disclose a display method for a navigation system for searching and displaying objects clustered within a search area, comprising the following steps of: displaying the clusters of the objects in the search area by a predetermined display method wherein cluster search algorithm includes the following step of: finding numbers on the object distribution matrix that are larger than any neighboring numbers and recording the higher numbers; temporarily masking the higher numbers on the object distribution matrix and erasing the neighboring numbers from the object distribution matrix; repeating the above operations until any remaining numbers on the object distribution matrix become equal to or smaller than a predetermined value; and erasing all the remaining numbers and recovering the masked numbers on the object distribution matrix, thereby obtaining distribution of the clusters of the object in the search area. This limitation in combination with the other elements in the claim was not shown or suggested by the prior art.
